

When lifting becomes easy

Dalmecc assesses your manual work and takes it to a more ergonomic and comfortable level

"Over 50.000 Dalmecc manipulators in use throughout the world."

Since 1963 DALMECC has become the world leader in the field of industrial manipulators. Every day new applications enrich our experience. More than 50.000 manipulators are in use throughout all the industrialised areas of the five continents. DALMECC is a totally integrated company, at the same time specialised and flexible. All processes, from design through to production and final testing are carried out exclusively by DALMECC personnel at our plant in Cles (Italy), which extends over an area of 25,000 m², of which 12,000 m² are under cover.

Conceived not only to lift and move but also to tilt and rotate while handling, Dalmec manipulators represent smart and ergonomic solutions able to lift loads up to 900 kg in a virtually weightless manner. The systems are designed in such a way as to allow the handling of products with the utmost precision, flexibility and safety at every

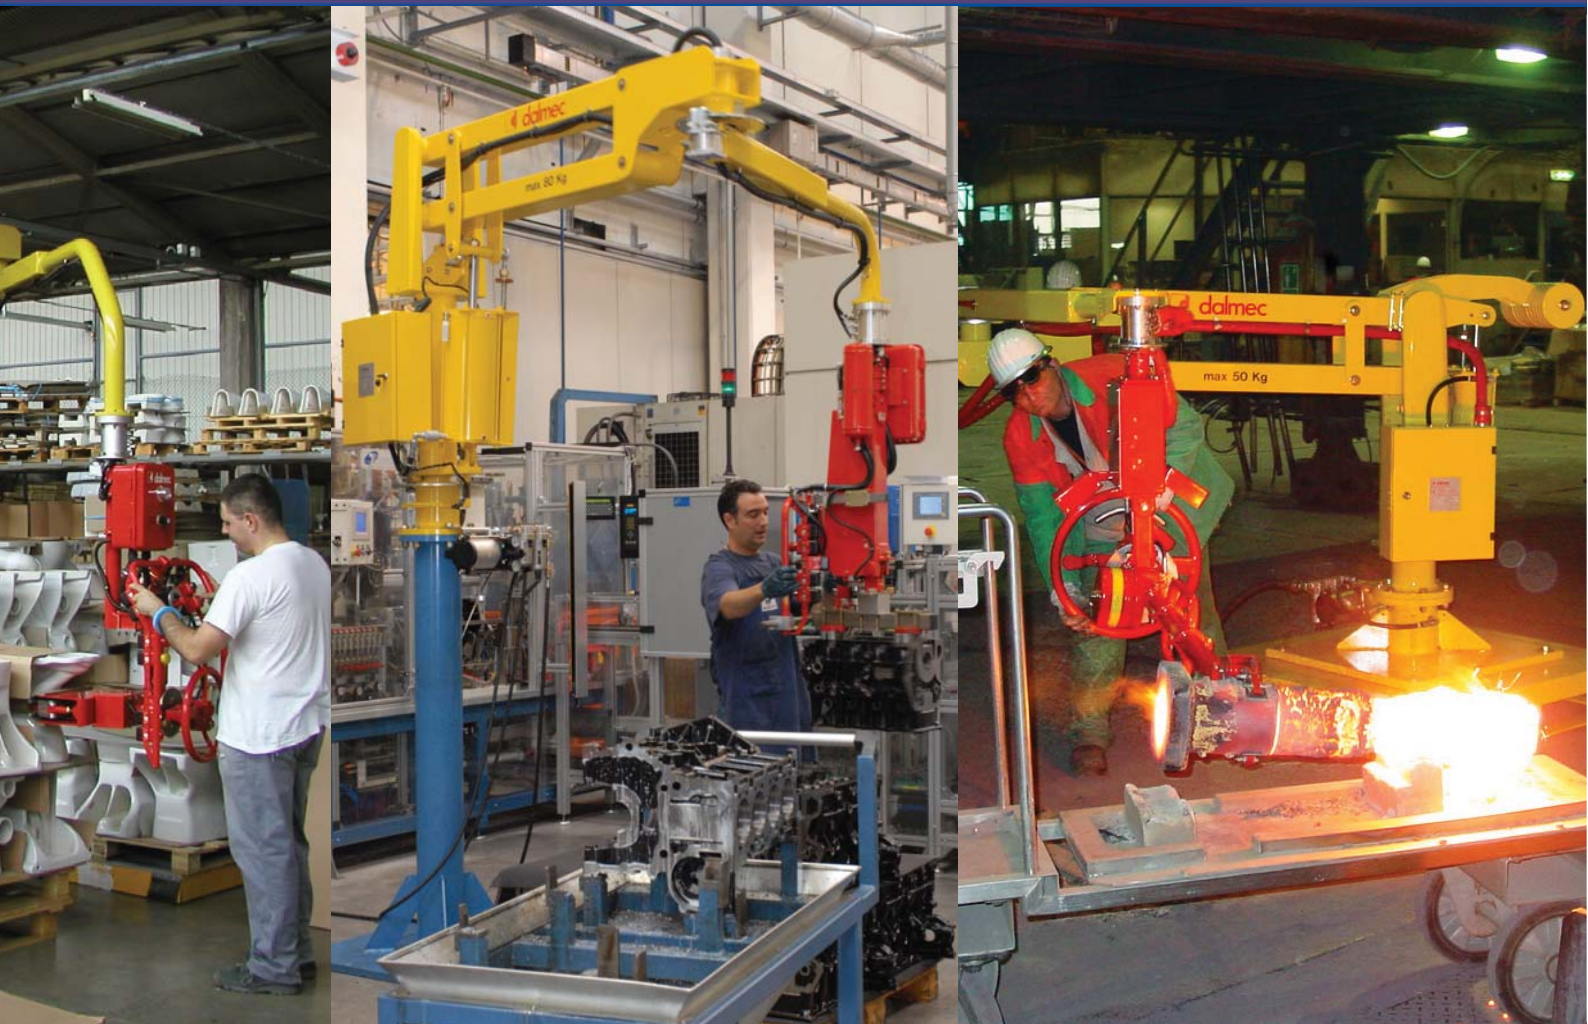

step, as well as to minimize physical exertion by your staff. This is how we improve both efficiency and the working conditions within your company.

Customized solutions for each sector

"Custom-made Manipulators to fit each specific situation."

Whatever may be your sector of activity, your company meets several problems every day related to manual handling. DALMEC solutions are able to ensure safe and continuous operation. Manipulators are customized and designed bearing in mind specific movements, operations and requirements of the production processes of every single customer. So, over the years, DALMEC has become a widely recognized and established supplier of solutions designed to optimize human resources in any production or logistics chain, with an immediate impact on work quality and profitability.

Dalmeccanica is present in companies all over the world. Dalmeccanica engineers and consultants have the necessary know-how to work with you during the whole process, from conception and design to the implementation of a new sector solution.

Customized solutions for each product

*"Whatever the product to be handled,
whatever the operation to be carried out,
DALMEC is with you."*

The main purpose of DALMEC manipulators is to assist the customer and give him support to reduce the weight of his workload and to enable him to work safely, efficiently and precisely. DALMEC continuously strives every day to find the best solution to allow the handling of any kind of product without any effort in accordance with the ergonomic criteria.

Dalmeccanica presents a wide range of versatile solutions to allow the lifting of products weighing from 10 up to 900 kilograms. This is possible because we are able to design and manufacture gripping systems for any kind of application, whether you need to lift mechanical parts, electrical equipment,

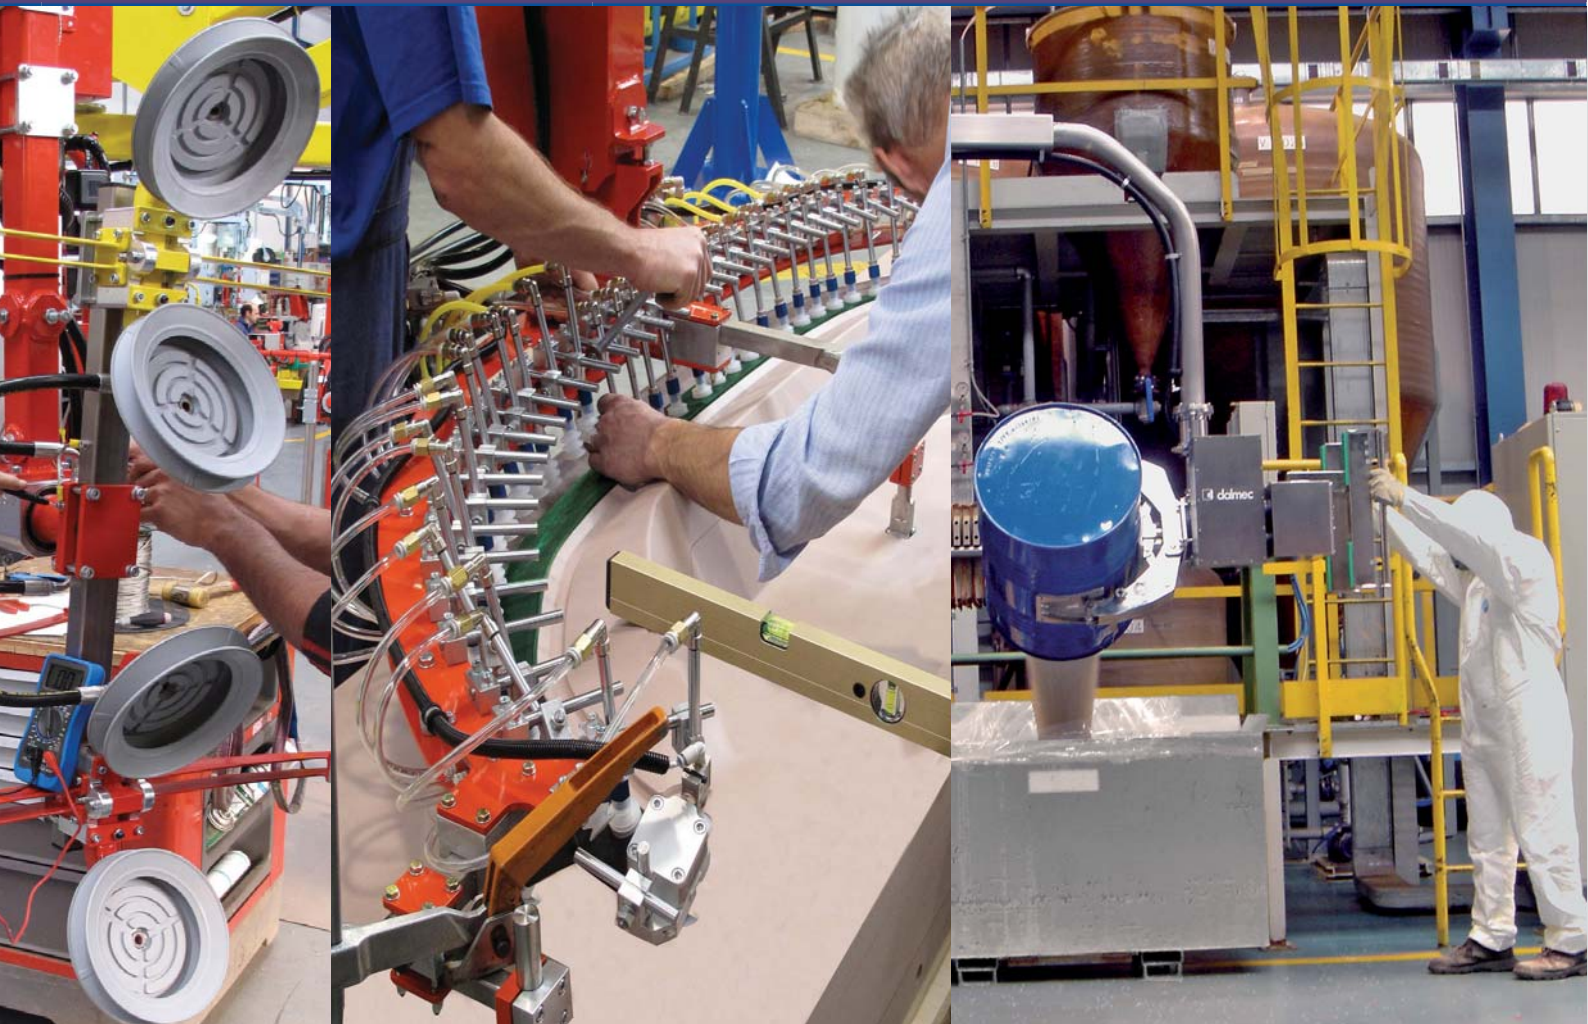

bobbins, cartons, pallets or food products. Our systems, thanks to their capacity to tilt and rotate, enable you to lift and handle your products with the upmost precision.

Quality means safety

"Each manipulator ensures security and safety of operation."

We consider safety a matter of utmost importance and a fundamental component common to all products that we manufacture in conformity with the UNI EN standards and in compliance with the EC Atex directives and with all safety guidelines and markings. Functional analysis, design, study of the different technical solutions available, simulations and prototypes creation are all phases in the production process that DALMEC carries out in close partnership with the client, with continuous controls and reviews during project development.

Dalmeccanica, thanks to a fifty year-long experience developed in all the industrial sectors and grown with over 50,000 manipulators manufactured, has refined through constant innovations all solutions to ensure maximum safety for the operator. Our production unit is certified EN ISO 9001:2008.

The EC mark applied to each manipulator warrants and certifies the adaptation of Dalmeccanica solutions to the requirements of the European standards, to the Machinery directive 2006/42 and Atex directive.

A worldwide presence

"Our specialized service department offers you the highest reliability."

DALMEC technical-commercial network extends worldwide to ensure a competent support during supply and an efficient after-sales service. Customer satisfaction has always been the main priority of DALMEC group. We always stand by our customers, from the delivery of the manipulator to the following use. All manipulators are subject to continuous tests and checks, even after installation, to guarantee safety and durability. Our spare parts and services department employs highly skilled technicians, constantly trained, to offer promptly qualified and effective support.

Dalmeccan organization is a guarantee for our customers and offers:

- Customer Service with specialized personnel, who are able to give advice and assistance to the customer to ensure the correct handling solution is provided;
- Well trained technical personnel to install and adjust the equipment as required;
- Engineers at the customer's disposal for the training of the maintenance personnel and for the setting up of the production.
